

INSPIRING STUDENTS TO CREATE THIER BEST

The team at iValue has contributed to the education sector for many years now and creating an Apple Lab for GLS is one example of that. We offered our comprehensive lab solutions for all the creative students who will soon become designers.

About GLS Institute of Design

GLS University has inherited one of the largest educational setups in the State of Gujarat and a group history of close to nine decades in the field of education. The current 10-acre campus of the University is located in the heart of Ahmedabad city with state-of-the-art facilities.

The University has one of the most beautiful campuses in the State which gives an energetic and enthusiastic learning environment.

The Challenge

People at GLS ID needed a lab which can complement the creativity of their students. They needed machines which can handle heavy software's used in designing like CorelDRAW, Adobe InDesign, Photoshop and more S/W's like these.

Students needed a lag-free experience and for that powerful machines were needed.

To overcome these challenges, iValue suggested a state-of-the-art computer lab to be created that is unlike any other lab.

Solution to the Challenges

To achieve that lag-free experience team at iValue offered comprehensive lab solutions, people at GLS ID were enchanted by the Apple which offers solutions for schools and university that creatively engage students and motivate them to take an interest in their own learning. Every Mac comes with all kinds of built-in tools for education. We delivered a ready to use lab for them rather than IT guys at GLS piecing together various hardware and software solutions, and hoping they all work together. As a certified Apple Education Solution Partner, Team at iValue had all the tools and talent to complete this project without any problems.

iValue established the whole Lab which included supply of all the iMac's and Apple TV, Projector's & LED Screens, all the wired and wireless networking solutions. Team at iValue also designed all of the lab interior, supplied and configured plotters and printers. iValue also provided an on-site engineer so all the troubleshooting can be done as fast as possible.
